Headmistress: Tímea Kapocsi

Our school is located in Ferencváros within the József Attila community, one of the greenest and most beautiful areas within Budapest with good accessibility and access to public transport.

The school opened its doors in 1961, and although its name and profile underwent several changes throughout the years, the faculty's openness and aspiration for quality education has remained unchanged. ***Our institution is an elementary school consisting of eight grades, with one bilingual class and one language orientation class per grade.***

In the latter mentioned, children also study English with 5 lessons per week. Our institution began the bilingual education program in 2001, therefore, we have a lot of experience behind us. From 1st grade onward, not only do we teach English 5 hours per week in split group form, but the basic competencies are also taught in English in the lower elementary classes. In upper elementary, additional English courses include Science and Civiliation in the 5th and 6th grade, while the 7th and 8th grade students are also taught biology and history partly in English. Our

native English lecturer also contributes to effective language learning. Many of our students are capable of successfully completing the European B2 level language exam by the end of the 8th grade.

Kőrösi's attractiveness is enhanced by our carefully designed pedagogical program, in which our precise goal is that our students acquire the curriculum and appropriate level of communication, each according to their own abilities. We are working for a school in which we arouse a child's interests towards subjects, where we teach them to learn and think independently, where we focus on their strengths, where they not only have friends but can also count on the help of their teachers, where they feel good. Our faculty is able to work together effectively and with enthusiasm in order to achieve our common goals. Our numerous programs throughout the year aim to improve the student's school life and to strengthen the sense of community.

We place great emphasis on discovering and nurturing talent, and on successful career orientation. Furthermore, it is highly important to us that we assist the development of students with disadvantages and learning difficulties. One of our main goals is to support the progress of our students through the use of digital tools and various innovative methods. ICT tools and web2 applications are used daily in the classroom to supplement teaching and communication.

Our quality education is reflected by the national competency test results, competitions, and the school's high average. Our students maintain their good results up through high school as well, and they are happy to come and visit us from time to time.

We have a beautiful yard with the opportunity to play sports, a playground, and a bird-friendly yard as well. In the afternoons, our students are provided the opportunity to attend a study group or club, or to play sports. Our teachers organise summer camps, ski camps, and some teachers take their students to forest camps. We strongly believe that our children develop the best within a positive, attentive, acceptive and supportive environment where the parents and teachers are partners in discipline and education. Parents actively support the pedagogical work of our school and are involved in school life by sharing their opinions, ideas, and by participating in school events.

With voluntary support of the school foundation, they contribute to a higher school standards. We encourage everyone interested in our school to follow our website (www.korosikettanyelvu.hu), where from February onwards, we publish all necessary information for our prospective 1st graders (introduction of our school and teachers, registration link for a personal introduction, assistance with online enrollment, district borders).
